# Insight

Architects Engineers Contractors

What do they actually sell?

**Time**

The faster they deliver, the better their margins

It's a **Time Arbitrage Business.**

# Problem

So where does the margin disappear?

## Code Compliance

**\$15 billion lost annually** in the U.S. to code compliance rework.

The process today is **highly fragmented**:

design, submit, wait weeks, get rejected, rework, resubmit.

There's no way to check compliance **until after the design is done.**

Every rejection equating to lost time: **\$20,000 to \$30,000** per project.

# Validation

We surveyed dozens of **architects and industry decision makers**

**72%** said a code compliance checker would be **useful**. **48%** said **very useful**

Then we asked what would **stop them from trusting one**

One word came up again and again  
**Accuracy.**

What would make you hesitant to trust or adopt an AI tool in your workflow?

Accuracy

**Accuracy** of assessment I would want a link to the referenced source.

Accuracy

The tool would have to work really well and be able to be quickly manually verified for **accuracy**. If it makes suggestions that are incorrect then it's more trouble than it's worth

Accuracy, privacy for NDA

Accuracy

An AI tool that is advising on issues that have **liability implications to the user** has to be as close to **100% accurate** as possible.

**Data security concerns**, and how much accuracy it can deliver when many codes like the IEBC in particular are changing regularly.

AI must be able to have as **strong a critical judgment skill** as that of an **architect** with decades of experience to make the right call.

[Check out the full survey here](#)

# Solution

Cuniform.

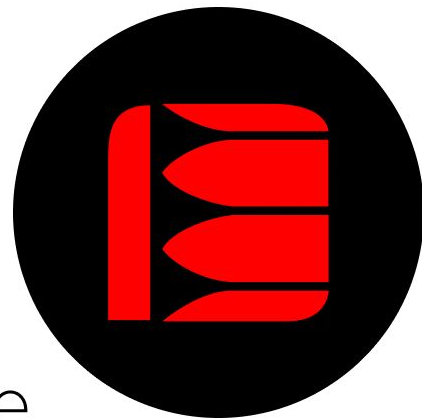

Code compliance checking **in real time**

**While designing**, not after

Fully integrated into industry standard software

Built for **Accuracy**

Every issue **cited** and **verified**

# Market

**19K**

Architecture  
firms in the US.

19K architecture firms in the US  
116K licensed architects.

At **\$59/seat/month**, capturing just  
10% of US architects is a **\$8.2M annual  
opportunity**.

Civil engineers triple the addressable seats.  
General contractors add another 700,000+  
potential users

**\$8M**

**10%**

of 116K Licensed  
Architects

**\$59\***  
seat/month

# Landscape

Y Combinator backed  
**\$33.5M** valuation. **\$7.64M** raised.  
Searchable code database and AI  
research assistant. Web based.

Lightning Capital backed  
**\$2M** Raised last round  
Automated plan review.  
Upload PDFs, receive reports.

Y Combinator backed  
**500K** raised  
AI plan review for building  
departments. Web Based

The category is validated. All our competitors serve the workflow after design is complete.  
**Cuniform** works **realtime during design**. No context switching. Native to the industry standard BIM modeling softwares.

# ROI

Cuniform Professional: **\$59/seat/month. \$708/year**

Conservative scenario

**4 hours** saved monthly on code research.

At \$150/hour, that's **\$600/month**

**\$7,200/year**

**10x return**

Realistic scenario

**One** prevented code rejection **per year.**

**\$20,000 in rework avoided.**

**28x return.**

The tool pays for itself in **the first week.** It's a discount on something they have already spend money on.

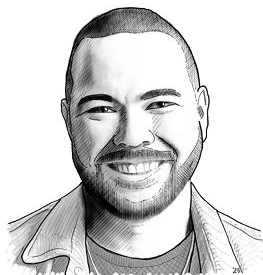

90%

of MVP done,  
30\* days till full  
completion

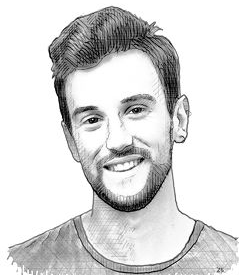

# Founders

**JOE YATCO - CEO**

10+ years in architecture.  
Experienced the code  
compliance problem firsthand  
across 80+ projects.

**KYLE GALLATIN - CTO**

10 years building production ML  
systems. Technical Lead Manager  
of ML Infra at Handshake.

**ARNAV SOMANI - CDO**

Led design at Smartmedia  
Tech. Shipped enterprise  
tools used by 1M+ customers

# Ask

We are seeking **\$1 million dollars**  
in funding at a **\$5 million\* dollar valuation.**

## Use of Funds

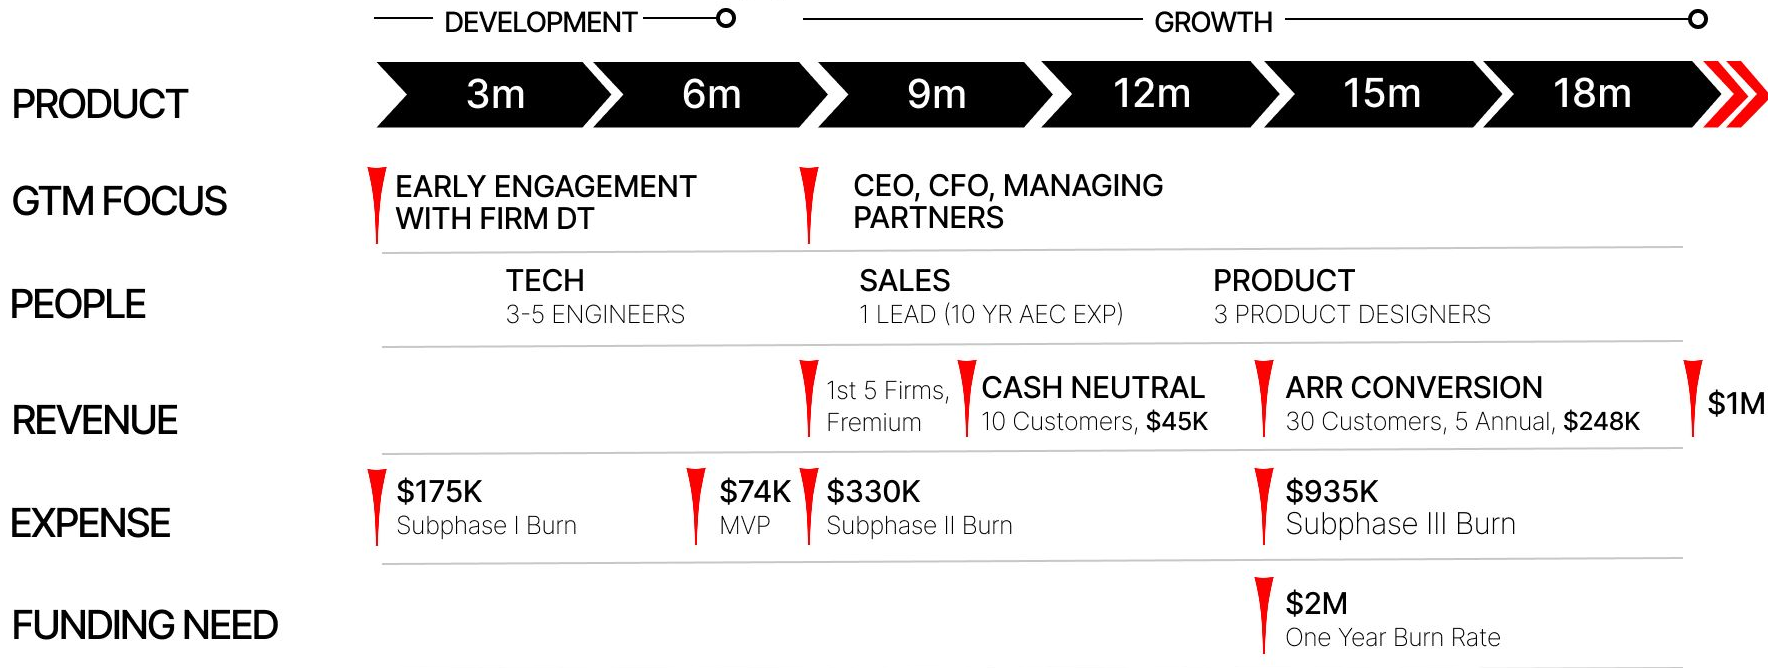

50% Engineering  
30% Go-to-market  
20% Operations

## 18-Month Milestones:

Product launch  
50 paying customers  
\$100K ARR

# Roadmap Milestone

# Thank you
